Chapter 251: The Endless Worlds of Sung Jin-Woo

Sung Jin-Woo's power had long surpassed the unimaginable, and in his pursuit of absolute mastery over existence, he made a monumental decision: the creation of 1,100,001 inner worlds within his being. Of these, 1,100,000 were devoted to his clones, and 1 was reserved for Umbrios, the lesser Absolute born from the essence of his original body.

Each of these inner worlds existed within the vast expanse of Sung Jin-Woo’s body, and each world was bound by a unique temporal flow—one second outside his body equated to one million years inside. This time dilation allowed his clones and their inner worlds to develop at an unprecedented rate.

The Structure of Inner Worlds

1. Sung Jin-Woo’s Original Inner World:
His singular, original inner world was the realm where Umbrios, his lesser Absolute, resided. Within this world, Umbrios governed with absolute authority, ensuring the balance of shadows and order in the realms.

2. The Clones’ Inner Worlds:
Each of Sung Jin-Woo’s 1,100,000 clones had their own distinct inner worlds, mirroring their creator’s power and essence. These inner worlds were designed as self-contained dimensions with infinite potential for growth and transformation. Each clone’s inner world followed the same time dilation as Sung Jin-Woo’s, where a single second outside allowed for the passage of one million years inside.

The Layers of Inner Worlds

The complexity of the inner worlds grew exponentially, for each of the seven layers within every clone's domain mirrored the structure of Sung Jin-Woo’s ultimate mastery.

1. The First Layer: The primary realm within each clone’s inner world, governed by the clone’s lesser Absolute. Each first-layer world is vast and capable of shaping realities, molding entire galaxies, and sustaining armies.

2. The Second Layer: Born from the minds of the first-layer lesser Absolutes, the second-layer worlds were smaller in scale but equally potent. The lesser Absolutes created within them had their own dominion, but their influence was always secondary to the first layer.

3. The Third Layer: Within these dimensions, lesser Absolutes of the second layer gave birth to new inner worlds. These new rulers, while powerful, were still bound to the laws and structures established by their progenitors.

4. The Fourth to Sixth Layers: As the inner worlds descended deeper, they became more fragmented and specific in their design. These layers birthed lesser Absolutes who carried forward the will of their creators but with more specialized goals and limited scope.

5. The Seventh Layer: At the deepest level of any clone's inner world, lesser Absolutes that governed the seventh layers represented the culmination of a clone's essence. They wielded powers vast enough to rival even the strongest forces outside the inner worlds.

The Lesser Absolutes and Their Armies

With each layer of inner worlds, the lesser Absolutes created vast, thriving civilizations and armies that would serve to maintain order and eliminate any sign of rebellion. These armies were not bound by the same limitations as those in the outer realms. They grew exponentially, with each world within the layers producing new legions, constantly expanding in number and strength.

These forces would not hesitate to crush any rebellion, and their overwhelming power ensured that no chaos could ever threaten the divine structure created by the Divine Triad and Sung Jin-Woo.

The Power and Influence of the Layers

The layers within each clone's inner world became a reflection of their creator's desires and ambitions. As each clone's army expanded and their lesser Absolutes developed, the divine network grew more complex. In essence, every inner world, from the original body of Sung Jin-Woo to the farthest reaches of his clones, became a self-contained universe capable of influencing the greater multiverse.

Though Sung Jin-Woo's power was already unimaginable, the exponential growth of these worlds marked the dawn of a new era where the very fabric of existence would bend to his will. The infinite worlds within him, constantly expanding in every direction, would eventually intersect and intertwine, forming a divine empire beyond the limits of even the most powerful beings in existence.

The dominance of Sung Jin-Woo's inner worlds and the lesser Absolutes grew unchallenged. The endless layers of creation and their infinite armies became an unstoppable force—a force that would ensure the absolute reign of Sung Jin-Woo, his clones, and their boundless domains for eternity.
